### Irrigation Systems

Our irrigation systems fit any planter, reducing watering by delivering water directly to plant roots, ensuring optimal hydration and minimizing waste.

### Casters

Select planters can have recessed casters for mobility, discreetly built into a reinforced, raised base for smooth rolling without affecting aesthetics.

### Lift Channels

Designed for large, heavy planters, these channels allow safe, easy movement with pallet jacks or forklifts, maintaining design flexibility and maximizing efficiency.

### Matching Saucer

Prevent surface staining and water runoff with our matching saucers. Seamlessly integrated, they enhance functionality and aesthetics with a perfect color and finish match.

### Water Sealing

Our water sealing option protects planters from moisture damage, ensuring durability and integrity.

### Bottom Reinforcement

For planters needing anchoring or lacking ground structure support, additional base reinforcement ensures stability and prevents damage.

### Accessory Pocket

These planters feature integrated compartments for lighting, audio, power, and data. A compatibility chart is available for standard fixtures; custom solutions can be explored.

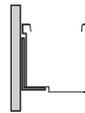

### Trellis

Optimize your commercial landscape with our durable and customizable trellis, engineered to support vertical plant growth and elevate aesthetic appeal.

### False Bottom

False bottoms lighten large planters by reducing soil while creating a water reservoir to extend watering intervals, and save on materials and maintenance time.

### Wall Hanging Planters

Wall scaping made easy with adjustable bracket mount points for easy and secure on-site wall planter install. Choose from standard or built in hidden brackets.

### Drain Holes

Drainage holes are available on all our planters. Simply let us know your preference.

### Scoops

Square and rectangular planters connect end-to-end with hidden "scoops" for seamless, continuous planting beds.

### Bioretention

This engineered layer filters rainwater, removes pollutants, and promotes slow release into the surrounding soil or storm drain system, thereby reducing runoff and improving water quality.

### Anchor Plate

For increased stability, add an anchor plate to your planter to distribute weight and prevent tipping.

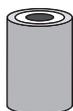

### Tie Downs

Tie downs in planters secure trees and large plants, ensuring they remain stable, upright, and centered through evenly distributed ties, promoting proper growth and preventing damage.

### Custom Colors

We provide 13 custom color options and finishes for our Fiberstone/GFRC products, 24 color options and 4 finishes for our Fiberglass products. Armorecoat and premium metallic colors available.

### Refuse Container

Transform your planter to a refuse container with a variety of lid options and liners.

### Custom Dimensions

Custom dimensions available on all planters.

We offer a variety of customization options, but availability may vary by product. To discuss creating a custom order or inquire about specific options, please scan our QR code, visit our website, or call us.
